**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

---

1. Statement

Novelty (N)	Yes: Claims	1-15
	No: Claims	
Inventive step (IS)	Yes: Claims	1-15
	No: Claims	
Industrial applicability (IA)	Yes: Claims	1-15
	No: Claims	

2. Citations and explanations (Rule 70.7):

**see separate sheet**

1. The following document is referred to in this communication:  
D1 : WO-A-03/072925
2. Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parenthesis applying to this document):  
*An apparatus for conditioning air and fuel supplied to a combustor, comprising: means (fig. 1) for electrostatically charging air supplied to a combustor, at a first polarity, the means extending into a first duct (2) through which in use air flows to the combustor;*  
*and means (fig. 2) for electrostatically charging fuel supplied to such combustor, at opposite polarity to said first polarity, the means extending into a second duct (9) through which in use fuel flows to the combustor.*  
(see page 2, line 21- page 3, line 16; figures 1, 2)

From this the subject matter of the independent claim 1 differs in that:

*the apparatus according to the invention also contains means for preheating the fuel and an earted electrode within one of the ducts.*

The subject-matter of the device claim 1 and the corresponding method claim 14 is therefore novel (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as how to improve the combustibility of the air fuel mixture.

The solution to this problem i.e. the means for preheating the fuel in combination with the earted electrode within one of the ducts of the present application is considered as involving an inventive step, because such a configuration is not known from, nor rendered obvious by the available prior art.

The subject-matter of the device claim 1 and the corresponding method claim 14 is therefore also inventive (Article 33(3) PCT).

3. Claims 2-11 are dependent on claim 1 and claim 15 is dependent on claim 14 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
